

RAINWATER HARVESTING

EDUCATIONAL MONITORING UNIT

Digital display units for monitoring of rainwater harvesting systems.

- Dual display gives live digital readings of litres used and tank status (% full).
- Available in three different forms to suit various applications.
- Manufactured in-house & can be tailored to suit project.
- Particularly suitable for schools, colleges and public buildings.
- A2 format gives good visual impact and is easily read.
- Can be individualised to include clients logo etc.

Many buildings now have rainwater harvesting systems installed in them, but very often this is not apparent, as almost all of the components are not readily visible.

Our display units are a simple method of telling people what is there and an excellent way of showing your rainwater system in an easy-to-read format. Your clients can soon understand what is happening behind the scenes and can see the amount of water the system is saving.

The display unit is of sturdy timber construction with a laminated graphic board mounted on its face. The artwork can either be one of our generic illustrations or we can produce bespoke graphics for you to illustrate your building, as in the example shown above. The text can be tailored to suit your requirements and thus be made appropriate to your audience.

Digital display units for monitoring of rainwater systems.

Three options are available to order.

Basic digital display unit.

IP54 rated enclosure containing two digital meters, displaying litres used and tank full.

Information can be relayed to a computer for analysis etc.

Enclosure measures 180mm x 230mm

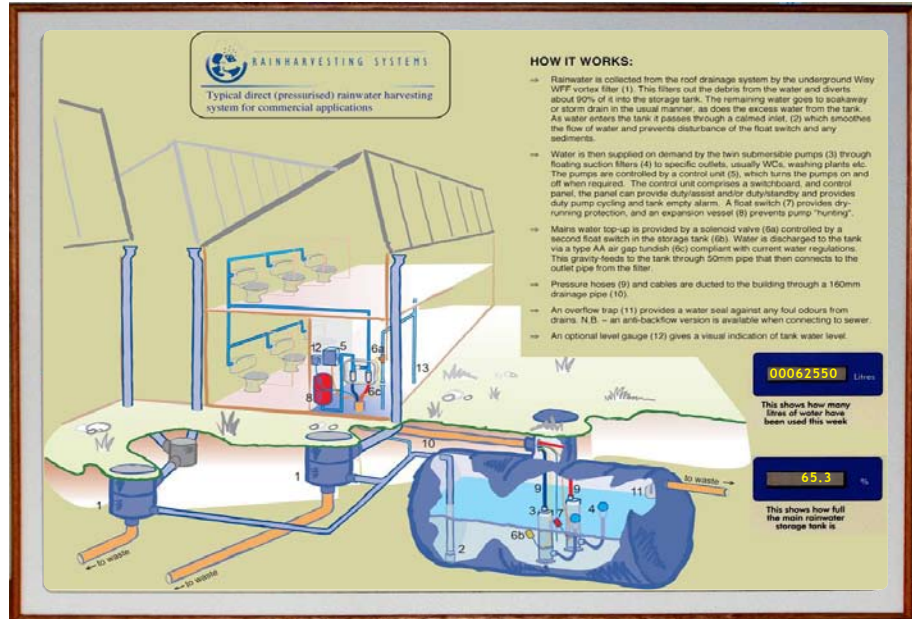

Generic illustrated digital display board.

Wooden enclosure with our own illustration printed on UV stabilised vinyl sheet, mounted on 3mm foamex board and laminated. Board contains two digital meters, displaying litres used and tank full.

Information from meters can be relayed to a computer for analysis etc.

Enclosure measures 850mm x 600mm

Bespoke illustrated digital display board.

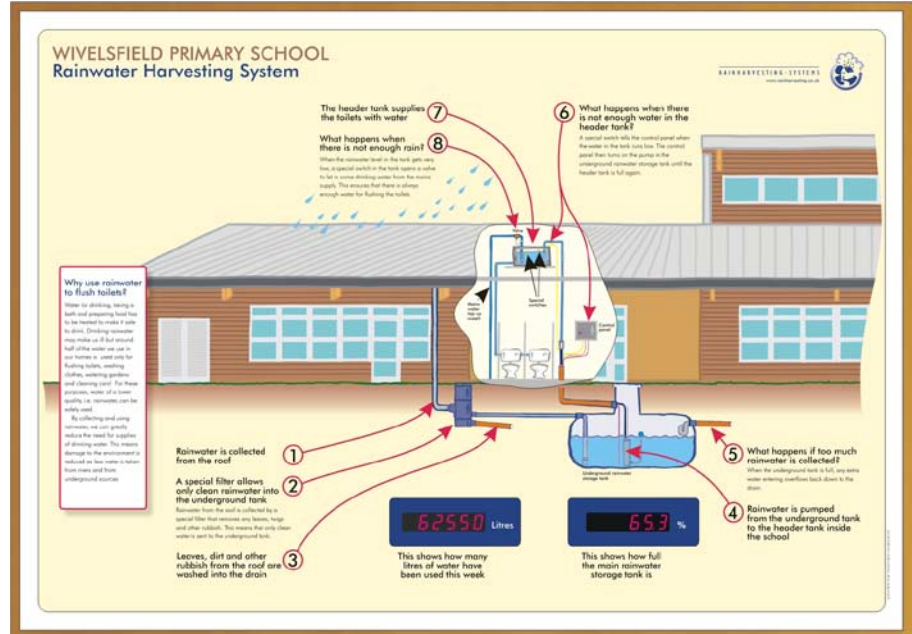

Wooden enclosure with a bespoke illustration printed on UV stabilised vinyl sheet, mounted on 3mm foamex board and laminated.

Illustration is done by our graphic designer to show your particular building, with text to your requirements.

Board contains two digital meters, displaying litres used and tank full.

Information from meters can be relayed to a computer for analysis etc.

Enclosure measures 850mm x 600mm
