

RAINWATER HARVESTING

BETA AUTOMATIC SUBMERSIBLE PUMPS

- Multi-stage submersible pumps in stainless steel & polyethylene
- Excellent for irrigation use
- In-built flow controller
- In-built non-return valve
- Automatic dry-run protection
- Maximum head 48m
- Maximum flow 95 l/m
- Direct suction, 1" nozzle or 1" bsp male inlet
- 1" bsp female outlet
- 3m lifting cord
- 15m cable

Submersible pumps for the delivery of clean water for garden and landscape use.

Intelligent built-in controller senses the water requirement and electronically switches the pump on and off.

Guaranteed protection against dry running.

The Beta 1000 model is suitable for most general and irrigation purposes.

The more powerful 1200 model is suitable for pumping over longer distances or where a greater pressure is required.

Versions are available for the connection of fixed or floating suction filters.

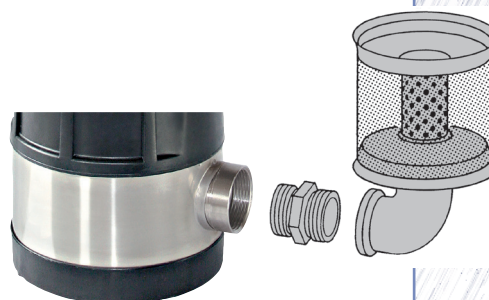

Beta 1000 / 1200 submersible pumps with direct suction inlet.

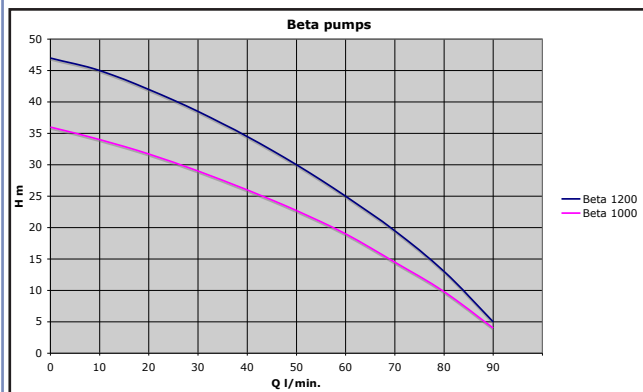

Beta 1000 / 1200T

Hose nozzle for Floating fine suction filter

Beta 1000 / 1200X

BSP connection for Fixed fine suction filter

Recommended optional extras available for systems using these pumps are: -
Fused spur with timer
Pressure vessel to suit
