

SLIMLINE STORAGE TANKS

- Bulk rainwater storage tanks for above ground use.
- Compact design permits installation in confined spaces. e.g. Cellars, outbuildings etc.
- Use for storing pre-filtered water.
- Rotationally moulded in the UK
- A range of sizes available from 400 to 1000 litres.
- Can be supplied with threaded connections, taps and level gauges.
- Can be easily linked together

Slimline polyethylene above ground tanks.

These UK manufactured storage tanks are available in various sizes.

When used with our Wisy® Downpipe or Vortex filters, these provide a cost effective means of storing *clean* water for household or irrigation. The 440-micron filtration gives good quality clean water suitable for a variety of uses.

The smaller tanks are ideal for garden irrigation water (*the 1000-litre model is equivalent to five standard water butts*). The addition of a pump will provide a pressurised supply.

Filtration.

There are many rainwater filters now on the market, but none have the same build quality and performance of Wisy® downpipe and Vortex filters.

The unique construction ensures trouble-free operation with zero risk of downpipe blockage and fine filtration down to 440 microns (0.44mm). Virtually self-cleaning and no replacement parts needed - ever.

Manufactured in Germany from high grade stainless steel, all Wisy® rainwater filters come with a 5-year guarantee.

For larger installations, a Vortex filter may be more appropriate. Separate data sheets are available for all the Wisy filters.

and RS type
downpipe filters

WATER SOLUTIONS FOR EVERYONE

Private housing

Gardens

Agriculture

Industrial

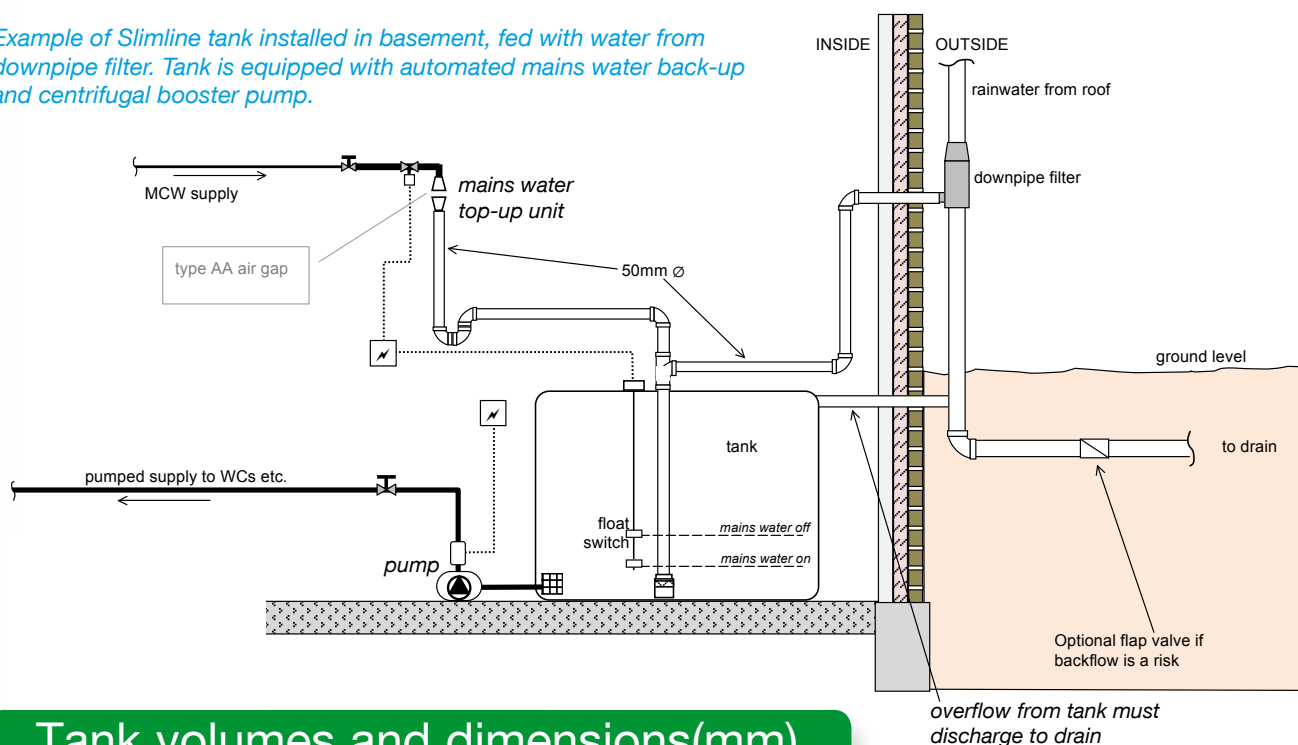

Commercial

Slimline tanks can be used for a wide variety of applications, from a simple manual garden watering system to a full domestic system with mains water back-up supply. Their narrow profile makes them suitable for getting into tight spaces such as cellars and outhouses. They also take up less space when used outside.

We also stock a wide range of pumps, filters, tank fittings etc. and can usually pre-fit tanks to your requirements.

Example of Slimline tank installed in basement, fed with water from downpipe filter. Tank is equipped with automated mains water back-up and centrifugal booster pump.

Tank volumes and dimensions(mm)

Tank volume	Height	Width	Length
400 litre baffled*	1050	400	1200
500 litre baffled*	1050	500	1200
500 litre Slimline	1200	650	870
800 litre baffled*	1200	600	1350
1000 litre baffled*	1200	600	1650
1000 litre Slimline	1300	760	1350

* baffled tanks are also available as 'upright' or 'flat' tanks.
e.g. 400L: 1200H x 400W x 1050L or 400H x 1050W x 1200L

We are founder members of the UK Rainwater Harvesting Association.

We are the UK's sole agent and distributor of Wisy products for rainwater utilisation.
