- Wide viewing angle
- Maintenance free

An easy to read graduated scale meter for tank contents display.

User selectable voltage & current
0-10 V / 4-20 mA / 10-50 mA

APM meter mounted in plastic box

The programmable dynamic backlighting provides a simple visual alert when the water level is too low or too high.

Backlight colour can be red, green or white and can be programmed to change when an alarm state is reached;

e.g. display is green in normal mode, then changes colour and/or flashes when water is at minimum or maximum level.

Example: water level is too low

Example: water level is too high
